

# ISO 14001:2004 standard

## Environmental Management Systems Auditing

Organizations are free to establish objectives, targets, and operational controls based on an environmental evaluation that identifies significant environmental aspects. These objectives, targets and controls are then supported by environmental programs and documented procedures as necessary. Companies seeking ISO 14001: 2004 compliance and certification need to begin with a strong management commitment to environmental responsibility and training to this issue.

**Objectives:**

Upon successful completion of the course, the participants will be able to plan, carry out and lead internal environmental management system (EMS) audits.
