

Occupational Health & Safety Management Systems Internal Auditor

The OHSAS 18001 standard is an effective tool to achieve the highest levels of managing safety and health in the shipping industry and is highly appreciated by key stakeholders.

This course provides the required insight in the OHSAS 18001 standard and the utilisation of one of the important management tools for improvement, "Internal Auditing". Internal auditing will be preferably in combination with other standards as ISM Code and ISO 14001 if adopted in the company.

Objectives:

- To get a clear picture of the OHSAS 18001 standard requirements.
- Upon successful completion of the course, the participants will be able to plan, carry out and lead internal Occupational Health and Safety Management System audits.

Contents:

- OHSAS 18001 scope and general requirements
- Internal auditing in the improvement process
- Internal Auditing Requirements
- Audit procedure and tools
- Audit conduct and techniques
- Development of good audit tools (like "help" lists)
- Typical problem areas

Teaching Method:

A combination of lectures with presentations, exercises and cases. During the course participants will develop a "Help" list.

Who should attend:

Internal auditors and managers within shipping and associated companies who are responsible for determining, measuring, and monitoring management performance and any continuous improvement programs.

Duration:

2 days

Language:

Lecture & Material in English

Certificate:

DNV Academy Certificate of Training
